

GOVERNMENT CAPABILITY STATEMENT

Applied AI systems for mission and operational workflows.

CORE CAPABILITIES

- **AI agent delivery** - Workflow definition, tool use, orchestration, controlled launch, and operator handoff.
- **RAG and knowledge workflows** - Ingestion, retrieval, citations, evaluation, and review for operational knowledge.
- **Automation and integration** - APIs, data sources, business systems, approval paths, and auditable workflow execution.
- **Trust and operations** - Permissions, human review, observability, acceptance criteria, and practical runbooks.

DIFFERENTIATORS

- Founder-led delivery with one accountable technical team.
- A bounded production release instead of an open-ended AI experiment.
- Evaluation and operator controls designed into the workflow from the start.
- Documentation, runbooks, and ownership transfer included in the handoff.

SELECTED FOUNDER EXPERIENCE

Experience before Moonveil AI spans enterprise CX AI, healthcare operations AI, precision medicine AI, supply-chain intelligence, and public-data intelligence.

Disclosure: This is individual founder experience and is not presented as Moonveil AI corporate past performance.

DELIVERY MODEL

Scope > Build > Launch > Hand off

Focused 4-8 week delivery for appropriately scoped projects.

MISSION-RELEVANT USE CASES

- Knowledge assistants grounded in policy, guidance, and program documentation.
- Analyst support for intake, triage, research synthesis, and reporting.
- Workflow automation across existing systems, APIs, and approval paths.
- Human-in-the-loop decision support with citations, controls, and audit trails.
